London
Milbank,

Dear James Bond,

Aspose.Words supports most elements of Microsoft Word documents including paragraph, character and section formatting, styles, bulleted and numbered lists, tables, headers and footers, inline images, office drawings and mail merge fields.

With **Aspose.Words** you can:

- Insert text, images and other content, specify font and paragraph formatting.
- Merge data into your document from DataTable, DataView, DataReader or a DataSet.
- Define mail merge regions that will dynamically grow inside your document.

Regards,
Aspose.Words Development Team.
